T100 summary: The feel is the best out of the T Series range but the yardage drop between a solid strike and a slight miss hit is by far the greatest. T100 TRACKMAN NUMBERS T200 What the brand says: It delivers powerfully playable distance with a tour-inspired look and feel. Maximum Impact technology spreads maximum speed and distance control evenly across T200cAAA's thin, forged L-face cAAA with high launch and stopping power to convert near misses into near-perfect strokes. What we found:À Having played the AP3 for more than 8 months, the T200 was the club I was most interested in. We know that the AP3 is long, due to its low centre of gravity and strong lofts, so it came as no surprise that the T200 evolved this characteristic even further. On our test of the T200, it carried seven yards longer with the same shaft and loft. This was achieved with a new thinner, faster forged SUP-10 L-Face Insert and 90g of high-density tungsten, placed in the heel and toe to lower the centre of gravity even further. This means the T200 spun on average 700rpm less than the AP3 but achieved a landing angle of 47.4 degrees cAAA identical to that of the higher lofted T100 and one-and-a-half degrees higher than the AP3. T200 summary:À À I was blown away with the performance but was more impressed with how the forged face improved the acoustics and feel. Yet this was the only real negative of the AP3. T200 TRACKMAN NUMBERS T300 What the brand says: The T300 offers the most forgiving playercAAA's experience possible, with a modern shape that rewards the player with faster ball speeds and preferred feel. Maximum Impact technology extends maximum speed across an extremely forgiving mid-sized face, powering a fast cavity-back design that delivers the best combination of high launch, long distance and forgiveness.control with exceptional stability.
